Series: IRAK Plate: 73 Row: o Column: 16
This clone was selected for flowing sequencing because it
passed the following selection criteria: matched mRNA gi: 15718669
This clone has the following problem: frame shifted.
                                                                                                                                                                                                                                                                                                                                                                       Email: cgapbs-r@mail.nih.gov

Following this first strand reaction, double-stranded cDNA was blunted, ligated to Notl adapters, digested with EcoRI size-selected, and cloned into the Notl and EcoRI compatible sites of a custom modified MCS of the pBluescript (KS+) vector. The library was normalized in 2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         /clone_lib="CSEQRBN21"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          21429098
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         11544199
                                  from 6.1 ug of total RNA, treated with T4 DNA polymerase, from 6.1 ug of total RNA, treated with T4 DNA polymerase, and purified by ethanol-precipitation. The cDNAs were ligated to Lone-linker LL-Sal4, purified by phenol/chloroform, and separated from free linkers by phenol/chloroform, and separated from free linkers by centricon 100. Then, the cDNAs were amplified by long-range high fidelity PCR using Ex Tag polymerase long-range high fidelity PCR using Ex Tag polymerase (Takara) with a primer Sal4-S. The products were purified by phenol/chloroform and Centricon 100. The cDNAs were by phenol/chloroform and NotI enzymes and cloned into digested with SalI and NotI enzymes and cloned into SalI/NotI site of pCMV-SPORT6 plasmid vector. The DH10B E. SalI/NotI site of pCMV-SPORT6 plasmid vector The DH10B E. SalI/NotI site of pCMV-SPORT6 plasmid vector size is about standard chemical method. The average insert size is about 3.0kb. The library was constructed by Yulan Piao."
